

TURBO/COMBI

TURBO PRO 50 S COMBI

Stiga Turbo Pro 50 S Combi Stiga

A professional and self-propelled lawnmower with collector. The versatile lawnmower is working as three machines in one.

Stiga Turbo has long been regarded as one of the best collecting lawnmowers on the market. The model can also supply other needs. When you need to work through really high grass you just drive without the collector. Easily insert a plug and the lawnmower can also be driven in Multiclip mode. You don't have to rake or empty grass. Mowing is quieter and you fertilise the grass at the same time.

The lawnmower is designed for professionals and others who want the best. Professional features are for example a very sturdy design with deck (20 years warranty)* and wheels in aluminium, central height adjustment and friction mount blade that protects the engine if you hit solid objects.

Cutting width is 48 cm.
